Cantaloupe

Cucumber

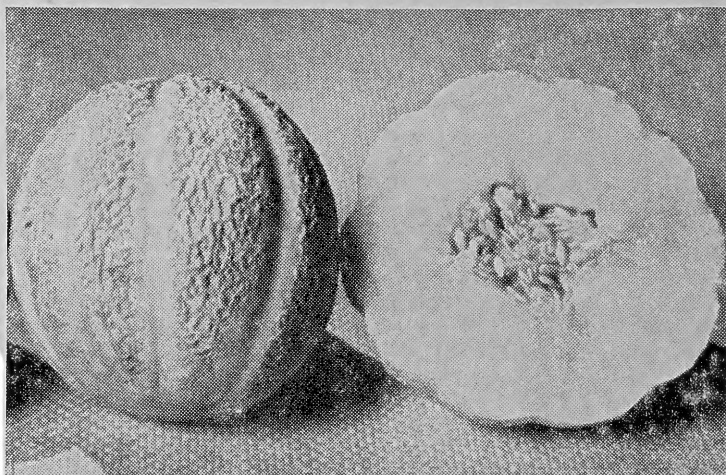

Squash & Pumpkin

OUR FUNCTION, primarily, is to serve the wholesale seed trade. We are specialists in a large and complicated industry. Our position is that of maintaining the breeding stocks and producing the seed of the Cucurbits; Watermelon, Cantaloupe, Squash, Pumpkin, and Cucumber. This is a difficult family to maintain because of their ease of cross pollination. Our whole program, from selection of farms, isolation, stock seed control, threshing, washing, drying, milling, and packaging is designed and personally supervised by trained and experienced personnel. Our equipment and management are designed and geared to the special problems of the "Vine" seeds.

We recognize the problems of our customers and of the ultimate growers. Diseases, insects, chemical treatments, new varieties, special packaging, and marketing trends are all part of the rapidly changing picture.

YOU ARE sure of obtaining the best when you contract with us.

DELIVERY on contracts has averaged above 95% for the past 4 years!

IROQUOIS. Resistant to Fusarium Wilt. A very thick-fleshed & high quality variety, gaining in popularity. Our improved stock is excellent for uniformity and trueness to type.

NOTE: We usually start shipping cantaloupe seed in October.

* GM: Green meat; OM: orange meat.

ANNUAL TRIALS are maintained and carefully noted. Each variety, in fact each lot, we sell is tested for germinability in the field, purity of stock, and freedom from disease. Experimental varieties are also tested.

BREEDING WORK varies from mass selections, as seen above, to selection of individual fruits, cross pollination, etc. Mass selection is an important part of our program to maintain planting stocks which produce seeds for the most critical market garden trade.

Cucumber

Squash & Pumpkin

V. E. HOLLAR in one of our fields of improved Green Hubbard. This field is in northern California where we plant much of our acreage of the squashes and pumpkins. Growing conditions are ideal, and the great isolation required by these varieties can be obtained here. The most perfect fruits are saved for further increase and stock use. Milling, hand-picking, and shipping is done at our main plant in Rocky Ford.

Squash & Pumpkin

OUR SQUASH & PUMPKIN seed is fanned, screened, put over gravity, and HAND-PICKED if necessary.

THE NEW BLACKSTONE originally tested and reproduced as W453. Released by the U. S. Dept. of Agriculture on Dec. 3, 1956. Developed at the Southeastern Vegetable Breeding Laboratory, and tested for three years in the Southern Regional Watermelon Trials. Suitable for long distance shipment as well as local market and home garden. Resistant to anthracnose and also to fusarium wilt. Appearance and size similar to Black Diamond. Perhaps slightly smaller. We have increased this variety from a small amount of seed furnished by the USDA, and have a good amount ready for planting our 1957 acreage. We think the variety will be an improvement and will be widely accepted.

COLORADO CERTIFIED watermelon seed is the best that money can buy! Rigid requirements are enthusiastically enforced. Isolation is one-half mile or more; 99% trueness to type required; 95% freedom from whiteheart; 100% freedom from citron.

THIS PROGRAM and our sales volume is growing. You will profit by listing Colorado Certified if your trade is with the market garden or commercial growers. The cost to you is very little above Non-certified seed.

**WITH SOME OF THE
NEWER INTRODUCTIONS**

ASHLEY cucumber. First available in commercial quantity in the Autumn of 1955. Bred by Dr. W. C. Barnes and co-workers at Charleston, S. C. from parentage including Palmetto, Cubit, Puerto Rico 40, and Marketer. We have watched Ashley closely for two years now, in both our Colorado and California seed production fields. We think it should replace Santee and Palmetto. Earlier than Marketer, shape and color as good or better than Marketer. The most resistant to downy mildew of all varieties tested in Southern Coop Trials. Quality of fruit good.

RIO GOLD cantaloupe. Released in 1950 & gaining in popularity. Appearance is close enough to Hales Best to give it consideration as a shipper. Developed at the Lower Rio Grande Valley Experiment Station, from a cross (Cucumis melo var chito X Hales Best) X Smith's Perfect. Resistant to downy mildew, partially to powdery mildew, and some resistance to aphids. Deep orange flesh of good quality.

SMOOTHIE cucumber. AAS bronze medal for 1957 retail introduction. An attractive, extra smooth dark-green slicer; eight inches long, above average in flesh quality. Developed by Dr. J. M. Jenkins, Jr. of N. C. experiment station. Recommended as a novelty.

SEED GROWING CONTRACT

Hollar & Co. hereby agrees to undertake the production of the within named varieties and quantities of seed. The purchaser agrees to accept and pay for these seeds according to the following terms and conditions. This contract is final when signed and accepted at Rocky Ford, Colo. and is executed and performed at Rocky Ford, Colo. Sale is FOB Rocky Ford. Containers extra at market value. Terms net 30 days with 1½% discount for payment within 10 days for firms of good rating, otherwise draft with bill of lading. It is agreed that a pro-rata delivery will be accepted as a satisfactory delivery in case of shortage caused by short crop, fire or accident. It is agreed that any controversy or claim arising out of or relating to this contract, or the breach thereof, shall be settled by arbitration in accordance with the rules of the AMERICAN ARBITRATION ASSOCIATION or such other rules as it may designate. The arbitration shall be held in the U.S.A. unless the parties agree upon another locality. This agreement shall be enforceable and judgment upon any award rendered by the arbitrators may be entered in any court having jurisdiction thereof. All seeds sold under the limited warranty clause of the American Seed Trade Assoc.

According to the above terms and conditions you may enter our order for the quantities and varieties indicated.
